S.

S (es), the nineteenth letter of the English and other modern alphabets, and the eighteenth of the ancient Roman alphabet, derives its form (through the Ϟ and Ȿ, Ȣ of early Latin and Greek inscriptions) from the Phœnician W (Hebrew ש *shin*), which represented a voiceless sibilant: in some of the Semitic langs. (s), in others (ʃ). (Each of these phonetic symbols is intended to represent a class of sounds the articulatory positions of which vary considerably; the difference between the two classes is acoustically very recognizable, but the nature of the essential difference in formation is still obscure.) In ancient Greek and Latin the value of the letter is believed to have been always (s). In late L. *s* between vowels was in most instances pronounced (z), a sound which was not separately represented in the Latin alphabet. Hence when the Roman letters were adopted in OE., the letter S was used to represent both the unaltered Germanic (s), and the (z) which had been developed from that sound in certain positions.

In OE. *s* was pronounced (s) initially and finally, and medially when it was either contiguous with a voiceless consonant or began the second element of a compound; medially between voiced sounds it was pronounced (z). The southern dialect had in ME., and possibly in late OE., the peculiarity of voicing the initial *s* (in native words) as well as the initial *f* and *þ*. This phonetic habit extended to Kent as late as 1340, as is shown by spellings like *senne* (OE. *synn*, sin) in the *Ayenbite of Inwyt*; it is now confined to the south-western dialects.

In mod. English the general rule is that *s* is pronounced (s) at the beginning of a word or of the second element of a compound, and when doubled or in contact with a voiceless consonant. Between vowels, and when phonetically final, a single *s* is mostly (z). But there are many anomalies and uncertainties, especially in classical derivatives: cf., e.g., *absurd* (æbsɔ̈·ɪd), *observe* (ɒbzɚ·); with regard to some words usage is divided, as in *absolve* (æbs-, æbz-), and the words in *-ive*, e. g. *effusive*, *evasive*. Even *ss* is in some words sounded (z), as in *dissolve* (against *dissent*, *dissect*, etc.), *dessert*, *possess*.

The phonetic combinations (sy), (zy), when rapidly pronounced, are very similar in acoustic effect to the simple consonants (ʃ), (ʒ), the position of the tongue for these being intermediate between the positions for (s) or (z) and (y). Hence in some words where earlier Eng. had (sy) or (zy), written either as *s* (before diphthongal *u*) or as *si*, the modern language has (ʃ) or (ʒ), so that the letter has acquired these two new values. Examples are *sure*, *sugar*, *censure*, *mission* (mi·ʃən), *Asia* (ē·ʃă), *treasure* (-ʒŭɪ, -ʒɚ), *evasion* (-ʒən). In some varieties of vulgar speech this tendency is carried much further, as in the pronunciations (ʃiː, (prɪʒŭ·m) for *sue*, *presume*.

S is silent in a few words adopted from Old French, as in *aisle*, *isle* (hence also pseudo-etymologically in *island*); in the Law French *mesne*, *demesne*, a silent *s* was inserted by false analogy.

-s, *suffix*, forming adverbs, was originally *-es*, identical with the suffix of the genitive singular of many neuter and masculine sbs. and adjs. Several of the adverbs in *-es* that existed in OE. are genitives either of sbs. (neut. or masc.) as *dæges* by day, *nédes* NEEDS, *þances* voluntarily, or of neuter adjs., as *sóðes* truly; on the analogy of these, *-es* was added, with adv.-forming function, to feminine nouns, as in *nihtes* by night, *endelyfdes* in order. OE. had also advs. compounded of *tó* prep. and a genitive governed by it, as *tó-gegnes* (see TO-GAINS), *tó-middes* (see TO-MIDS); side by side with these there existed parallel and synonymous advs. like *on-gegn* AGAIN, *on-middan* AMID, in which the dat. or accus. was governed by a prep. Hence there arose in early ME. mixed forms such as *ageines*, *amiddes*; and the frequent coexistence of the two forms of the same adv., one with and the other without *s*, led to the addition of *s* to many advs. as a sign of their function. In some instances the extended form prevailed, as in *eftsoons*; in others it survived only in dialects, as in *oftens*, *gaylies* (Sc.). See also the articles -LING², -LI(N)GS, -WARD, -WARDS, -WAY, -WAYS.

In *once*, *twice*, *thrice*, *hence*, *since*, etc., the suffix is written differently. In AGAINST, ALONGST, AMONGST, AMIDST, and the dialectal *ounst* (see ONCE), the original *-es*, *-s* has become *-st*.

The confusion with SABAOTH was not peculiar to England; it occurs in MHG. and in med.Latin.

The word is now very often written (like the names of the days of the week and of festivals) with initial capital.]

1. a. In the original use: The seventh day of the week (Saturday) considered as the day of religious rest enjoined on the Israelites by the fourth (or in mediæval reckoning the third) commandment of the Decalogue. Phrases, *to keep, break the Sabbath.*

The word was never in England, as in some continental countries, a vernacular synonym for Saturday, though English writers of med.Latin used *dies Sabbati* as frequently as *dies Saturni.*

b. Since the Reformation, often applied to 'the Lord's day', i. e. the first day of the week (Sunday) observed by Christians in commemoration of the resurrection of Christ. This use was originally connected with the opinion that the sabbatic law of the Decalogue remains in force under the Christian dispensation, the date of the 'Sabbath' having by Divine appointment been changed from Saturday to Sunday; but it occasionally appears in writers who did not hold this view. In Scotland it is still very common. (Phrases as in 1 a.)

The notion that the Lord's day is a 'Christian Sabbath', or, more commonly (as in quot. 1340 under *a*) a substitute for the Sabbath, occurs in theological writings from the 4th c. onwards, but was not popularly current before the Reformation. In English, *Sabbath* as a synonym for 'Sunday' did not become common till the 17th century.

Sabian (sē'biăn), *sb.* and *a.* Also 7-8 Zabian, 7-8 Sabean, 8 Zabæan, Tsabæan, 8-9 Sabæan, Tsabian. [f. Arab. صابي *ṣābi'* + -AN.

According to Nöldeke, the word represents the pr. pple. of the Aramaic צְבָא *ṣ̌bhaṣ* to baptize (the צ being changed into ס as is usual in the Mandæan and cognate dialects). In the actual form in which the word occurs in Arabic, it has the appearance of being derived from the same root as the Hebrew צָבָא *ṣābhā* host (see SABAOTH); hence, as certain sects claiming the name of Sabians were alleged to be worshippers of the stars, the name was (already by Maimonides in the 12th c.) interpreted as referring to 'the host of heaven'.]

A. *sb.*

1. An adherent of a religious sect mentioned in three passages of the Koran (ii. 40, v. 73, xxii. 17), and by later Arabian writers.

In the Koran the Sabians are classed with Moslems, Jews, and Christians, as believers in the true God. On account of the toleration extended by Moslems to them, the name of Sabians was, some centuries after Mohammed, assumed not only by the Gnostic half-Christian Mandæans (whose religion is perhaps akin to that of the true Sabians), but also by certain actual polytheists. The statement of some Arabic writers is that the Sabians were professedly Christian, but secretly worshippers of the stars. (Cf. SABAISM.)

1661 BOYLE *Style of Script.* (1675) 35 For want of knowing the Religion of the antient Zabians..Of those Zabiists..I find a deep and general silence in Classick Authors. 1797 *Encycl. Brit.* (ed. 3) X. 462/2 The fourth [*sc.* apartment of hell] named *al Suir*, [Mohammedans assign] to the Sabians. 1841 *Penny Cycl.* XX. 295/2 That the unity of the Deity was however still acknowledged in the religious system of the Tsabians is manifest from the way in which this religion is spoken of in the Korán.

b. Used for MANDÆAN (see quot. 1883).

1797 *Encycl. Brit.* (ed. 3) X. 458/2 The Sabians have several books which they attribute to some of the antediluvian prophets. 1883 K. KESSLER *ibid.* (ed. 9) XV. 467/2 *note*, In their dealings with members of other communions the designation they [*i. e.* the Mandæans] take is Sabians.

2. In erroneous use: A worshipper of 'the host of heaven'; a star-worshipper.

1716 PRIDEAUX *O. & N. Test. Connected* I. III. (1718) I. 140 The remainder of this sect still subsists in the east under the same name of Sabians...That which hath given them the greatest credit among the people of the east is, that the best of their astronomers have been of this sect...For the stars being the gods they worshipped, they made them the chief subject of their studies. 1864 COL. GREENWOOD in *Athenæum* 23 July 115/3 Bishop Cumberland and Bishop Warburton..agree that Cain..and his descendants were Sabæans. Abraham and Moses were Sabæans till Jehovah revealed himself to them.

B. *adj.* Pertaining to the Sabians (in the various applications of the name: see A).

1796 MORSE *Amer. Geog.* II. 571 The Sabean Christians have, in their religion, a mixture of Judaism and Mahometanism. 1849 J. M. ARNOLD *Ishmael* 35 In a Sabian Almanac ..it is stated: 'They fast in it seven days..in honour of the great Lord, the Sun, the Lord of all Good.' 1886 *Encycl. Brit.* XXI. 128/1 It is quite inappropriate to call star-worshippers in general Sabians or Zabians or to speak of a distinct Sabian religion, as older writers do.

Sabianism (sē'biăniz'm). Also 9 **sabæanism**. [f. prec. + -ISM.] The religion of the Sabians; chiefly in erroneous use, worship of 'the host of heaven', star-worship. Cf. SABAISM.

The identity of the word with SABLE *sb.*[1] is commonly assumed, though some difficulty is presented by the fact that the fur of the sable, as now known, is not black but brown. Some have conjectured that it may have been customary to dye sable-fur black (as is now often done with sealskin), perh. in order to heighten its contrast with ermine, with which it was often worn.

The development by which the heraldic term has become a general (poetical or rhetorical) synonym for 'black' is peculiar to English.]

Sack (sæk), *sb.*3 *Obs.* exc. *Hist.* Forms: α. 6 *north.* **wyn seake**, *Sc.* **wyne seck, vyne sekk**; β. 6 **seck(e**; γ. 6 **sakke**, 6–7 **sacke**, 6– **sack**. [Early 16th c. *wyne seck*, ad. F. *vin sec*, 'dry wine'. Cf. G. *sekt*, earlier (17th c.) *sek*, Du. *sek*.

Vin sec is given by Sherwood 1632 (but not by Cotgrave 1611–32) as the Fr. equivalent of 'sacke'. According to Littré, *vin sec* meant only 'dry wine' in the current Eng. sense, i. e. wine 'free from sweetness and fruity flavour'; there appears to be no ground for the assumption made in Grimm's *Deutsches Wörterbuch*, s.v. *Sekt* (and in earlier German dictionaries from the 17th c. onwards), that it at some time meant 'wine from *dried* or partially dried grapes'. Some difficulty therefore arises from the fact that *sack* in English, as well as *sekt* in German, was often described as a sweet wine (so already in our earliest quot.), though Shakspere's mention of 'sack and sugar' shows that it was not always such even in the 16th c. It is possible that before the recorded history of the name begins it had already been extended from the 'dry' wines of a certain class to the whole class, and had afterwards come to be applied esp. to those wines of the class which were originally excluded. But evidence is wanting. The Sp. **vino seco*, It. **vino secco*, usually cited by etymologists, appear not to be recognized by the lexicographers of the respective langs.

The form *sack* is not a normal development from the original *seck*. It may perhaps be explained by the fact that in the 16th c. *seck* was a provincial form of Sack *sb.*1; persons who were accustomed to regard 'seck' as a mispronunciation of *sack* may have applied the supposed correction to the name of the wine. It is not, in the present state of the evidence, probable that there was ever any confusion with the OF. *vin de sac* ('*Saccatum*, vin de buffet, vin de sac', in a gloss quoted by Godefr.), OHG. *sacwîn* (written *saicwin*), MDu. *sacwijn*, which according to early explanations meant a beverage made by steeping the lees of wine in water, and then straining through a bag.]

Sack (sæk), *sb.*4 Also 7, 9 **sac, 8– sacque**. [Cf. G. *französischer sack* (Grimm), Du. *sak*, both applied in the 18th c. to a French fashion of gown then worn by ladies. This, with Pepys' spelling (quot. 1668–9), would seem to indicate adoption from F. *sac*, but the Fr. lexicographers do not recognize the word in this sense.

It is possible that both the senses below, or sense 2 only, may have originated as transferred uses of Sack *sb.*1 To place them under that word would however be inconvenient, on account of the marked divergence of application, and the fact that the pseudo-Fr. spelling *sacque* is still frequent in both senses.

Sense 2 is given by M. Heyne (in *Grimm*) as a modern tailors' use of G. *sack* (also *sackpalatot* 'sack' overcoat); but this may possibly be from English.

In the following quot. *sackes* may denote some article of clothing, but its sense is obscure, and it is not certain that it is English:—

F. *saquebute*, earlier *saqueboute, -botte*, etc.; not found as the name of a musical instrument earlier than the latter half of the 15th c., but presumably identical with ONF. *saqueboute*, explained in the 14th c. as a lance furnished with 'an iron hook for pulling men off their horses' ('un grau de fer pour les garchons *saquier* jus de leurs quevaulz'). In the modern Norman dialect the word means a squirt. The first element is clearly ONF. *saquier* (= Sp., Pg. *sacar*) to pull, draw (which accounts for all the senses of the compound); the etymology of the second element is obscure; some scholars connect it with *bouter* to push.

The Sp. *sacabuche* (cf. the 16th c. Eng. form *shagbushe*), sackbut, also tube used as a pump, and the Pg. *sacabucha, -buxa*, with the same meanings, appear to be corrupt adoptions of the Fr. word. The Pg. word is identical in form with a word meaning a hook for drawing the wad from a gun, regularly f. *sacar* to draw + *bucha, buxa*, wad. Possibly the Fr. word may, when adopted into Pg., have undergone assimilation to the native word and then passed in the altered form into Sp.; but evidence is wanting.]

1. An obsolete musical instrument; a bass trumpet with a slide like that of a trombone for altering the pitch.

The word is to most readers known only from its occurrence in Dan. iii, where it is a mistranslation of Aramaic *sabbĕkâ*, which the LXX and Vulgate render (doubtless correctly) by Gr. σαμβύκη, L. *sambūca*, the name of a stringed instrument (see SAMBUCA). Coverdale 1535 (for what reason is not clear) renders the word by *shawmes*, thus taking it to denote a wind instrument; the Geneva translators, accepting this view, seem to have chosen the rendering 'sackbut' on account of its resemblance in sound to the Aramaic word. In this they have been followed by the 'Authorized' (1611) and 'Revised' (1885) Versions.

Sacrament (sæ'krămĕnt), *sb.* Forms: 3–6 sacrement, (*pl.* 2 sacraments, 3 sacra-, sacrements, 4 sacramens), 4 sakerments, 5 sacramen, sacriment, sakyr-, securment, 5–6 sacraments, 2– sacrament. [a. F. *sacrement* (12th c. in Hatz.-Darm.), ad. L *sacrāmentum* (whence the Fr. popular form *serment* oath), f. *sacrāre* to consecrate, set apart religiously, to secure by a religious sanction, f. *sacr-, sacer* holy, dedicated, set apart: see Sacred *a.*

In accordance with the functions of the suffix *-mentum* (see -ment), the etymological sense of L. *sacrāmentum* would be either (1) a result of consecration, or (2) a means of consecrating, dedicating, or securing by a religious sanction. The latter of these notions is that which seems to be present in the classical uses of the word: (1) the military oath, oath or solemn engagement in general; (2) the caution-money deposited by the parties to a lawsuit; hence (3) a civil suit or process. In Christian Latin from the 3rd century the word was the accepted rendering of Gr. μυστήριον Mystery[1]. This use is evidently not based on either of the specific applications above mentioned, but is the result of a recourse to the etymological meaning. In early Christian language *sacramentum* and the synonymous μυστηριον were applied indiscriminately to any ritual observance of the Church, or to any spiritually symbolic act or object; but they were also often applied in an eminent sense to the two most important observances, baptism and the Lord's Supper or Eucharist. For the later history of the use, see below in sense 1.]

1. *Eccl.* Used as the common name for certain solemn ceremonies or religious acts belonging to the institutions of the Christian church.

The English use before the Reformation adopts the enumeration of seven sacraments (believed to have been first formulated by Peter Lombard in the 12th c.; the same list is recognized in the Eastern Church): viz., Baptism, Confirmation, the Eucharist, Penance, Extreme Unction, Order, Matrimony. As late as the 14th c., however, there were still traces in English of the wider application of the word formerly current; while the seven sacraments were viewed as eminently entitled to the name, it could be applied in a more general sense to certain other rites (see quot. *c* 1375). From the 16th c., Protestants generally have recognized two sacraments only, viz. baptism and the Lord's Supper.

The formal definition of *sacrament* depends on the answer to the question what is the distinctive feature common to the seven or to the two 'sacraments', on account of which they form a separate class from all other observances. Those who accept the number seven, and many of those who admit only two sacraments, say that the sacraments differ from other rites in being channels by which supernatural grace is imparted. By those Protestants who deny that baptism and the Lord's Supper in themselves convey supernatural grace, the specific difference of the 'sacraments' from other observances is regarded as consisting in their paramount obligation as having been expressly commanded by Christ Himself, and in the special spiritual benefits obtainable by their faithful use.

By some of the English Puritans and Nonconformists, the word was avoided as being associated with opinions regarded by them as superstitious; the usual term applied by them to baptism and the Lord's Supper was *ordinance.*

1. Primarily, the slaughter of an animal (often including the subsequent consumption of it by fire) as an offering to God or a deity. Also applied *fig.* to the offering of prayer, thanksgiving, penitence, submission, or the like. Phrases, † *to do, make sacrifice*; also, † *to put in sacrifice*, to devote as a sacrificial victim.

In the primary use, a 'sacrifice' implies an 'altar' on which the victim is placed. Hence the figurative uses are often associated with references to a metaphorical altar.

The prevailing modern view is that the Zadok referred to is the high-priest of David's time, from whom the priesthood of the Captivity and later periods claimed to be descended. The late Jewish notion of a post-exilian Zadok (*Çaddūḳ*), the founder of the sect, is now regarded as baseless; the hypothesis that the word is directly derived from *çaddīḳ*, righteous, is philologically untenable.]

1. A member of one of the three 'sects' (the others being the Pharisees and Essenes) into which the Jews were divided in the time of Christ. According to the New Testament and Josephus, they denied the resurrection of the dead, the existence of angels and spirits, and the obligation of the unwritten law alleged by the Pharisees to have been handed down by tradition from Moses.

In origin the Sadducees seem to have been not so much a theological or philosophical sect or school, as a political party composed of the nobility, i. e. the members and connexions of the high-priestly family.

2. In a rope, wire, etc. supported at two points: The dip below the horizontal line, due to its weight; the perpendicular distance from its lowest point to the straight line between the points of support.

1862 *Ann. Reg.* 73 The 'sag' or droop of the cable from a straight line is 12 feet. 1889 Preece & Maier *Telephone* 136 A consideration which is of the highest importance for telephonic networks of wire is the length of the sag, or dip, of the wires between two supports. 1892 C. Sag (sæg), *v.* Inflected **sagged, sagging.** Forms: 5–7 **sagge**, (6 **sacke**), 9 **sagg**, 6– **sag**; 8–9 *dial.* **seg**(**g** (see E.D.D.). [First recorded in the 15th c.; the meaning (as well as the 16th c. form *sacke*) appears to point to connexion of some kind with mod.Du. *sakken*, MLG. *sacken*, Sw. *sacka*. Norw. dial. *sakka* to subside, settle down (also *sakk* subsidence), Da. *sakke* to lag behind (the Du. and Sw. words have also the nautical sense below). With sense 3 cf. Norw. dial. *sagga* 'to walk heavily and slowly, as from weariness' (Ross), for which other dialects have *sigga*, *sugga*.

The Du., LG., and Sw. forms appear to admit of no etymological explanation as native words; on the other hand the Norw. dial. *sakka* may be related to *sakka* (ON. *sǫkkva*) to Sink. It seems possible that the word is originally W Scandinavian, and has passed (? as a nautical term) into Sw., Du., LG., and (perh. through LG.) into English.

On this hypothesis the representation of the continental Teut. *hh* by *gg* would be an instance of the common uncertainty in the phonetic appreciation of foreign sounds. It is uncertain whether the Norw. dial. *saggo* abovementioned is related to the other words, and whether its resemblance in sense to the Eng. word is more than a coincidence.]

An ablaut-variant of OTeut. **sak-* is probably the **sōk-* represented by Seek *v.*, q.v. for the cognates outside Teutonic.

The only use surviving in mod Eng. ('for the sake of') has not been found in OE., and was prob. adopted from ON. It existed, however, in OHG. and OFris., and there is a possibility that it may have been in OE., though not evidenced in the literature. It seems to have arisen from the use of the sb. to denote a litigant's cause or case (see 1 b). Cf. L. *causā.*]

4. *nonce-use.* Regard or consideration for some one. [After *for the sake of* in sense 5.]

1590 Spenser *F. Q.* I. v. 12 Tho mov'd with wrath, and shame, and Ladies sake.

II. Phr. *For the sake of* (also † *for sake of*); *for* (one's, a thing's) *sake.*

In the latter of these forms, the word which precedes *sake* is a possessive (noun or pronoun); but down to the middle of the 19th c. the 's of the possessive of common or abstract nouns was very commonly omitted (doubtless owing to the difficulty of pronouncing the two sibilants in succession), and from the 17th to the early 19th c. the two sbs. were often connected by a hyphen, as if forming an attributive compound. The omission of the 's is now obsolete, but it is still not uncommon to write *for conscience sake, for goodness sake, for righteousness sake,* etc., without the apostrophe which is ordinarily used to mark the possessive of words ending in a sibilant.

The paragraphs marked β contain illustrations of the omission of the 's; some of the early examples there placed must be explained by the fact that the sbs. occurring in them (e.g. *soul*) had originally no *s* in the genitive.

5. Out of consideration for; on account of one's interest in, or regard for (a person); on (a person's) account.

Salic (sæ·lik, sē·lik), *a.* Also 6 **salicque**, 6–7 **-like**, 7 **sallick**, 7–8 **salick**, 6–9 **salique.** [ad. F. *salique* or med.L. *Salicus*, f. *Salii* (see SALIAN 2).] 1. *Salic law*: in early use, and still in popular language, the alleged fundamental law of the French

monarchy, by which females were excluded from succession to the crown; hence *gen.* a law excluding females from dynastic succession. In this sense still often spelt *Salique* and pronounced (sălīk).

The ancient text which under the name of the 'Salic law' was adduced in favour of the succession of Philip V in 1316, and afterwards used to combat the claims of Edward III of England (and his successors) to the French crown, was really a quotation from the *Lex Salica* (see sense 2); the words however (cap. lix. § 5 of modern editions) have no reference to succession to the crown, but merely state that a woman can have no portion of the inheritance of 'Salic land' (*terra Salica*); the precise meaning of this term is disputed, and in the earliest form of the code the word 'Salic' is omitted.

a 1548 Hall *Chron., Hen. V* (1550) 4 b, The lawe Salicque was only fayned and invented to put your noble progenitours and you [Hen. V.] from your lawfull right and true inheritaunce. 2. In the original sense of L. *Salicus*: Pertaining to the Salian Franks. Chiefly in *Salic law* or *code* (L. *Lex Salica*), a Frankish law-book, written in Latin, and extant in five successively enlarged recensions of Merovingian and Carolingian date.

1781 Gibbon *Decl. & F.* xxxviii. (1787) III. 583 Before the election of the Merovingian kings, the most powerful tribe, or nation, of the Franks, appointed four venerable chieftains to compose the Salic laws. *Ibid.* 594 Besides these royal and beneficiary estates, a large proportion had been assigned, in the division of Gaul, of allodial and Salic lands. 1879 *Encycl. The name originally comprised such substances as resembled common salt (sense 1) in their appearance or properties, e. g. substances produced by the evaporation of watery liquids as salt is produced by the evaporation of sea-water. The quality of taste was not originally considered to be a criterion of the class, but was added in the 18th c. when these substances were ultimately divided into 'acid salts' (*salia acida*), 'alkaline salts' (*salia alkalina*), and 'neutral salts' (*salia neutra, media*, or *salsa*), corresponding to the modern 'acids', 'alkalis', and 'salts'.

6. *Mod. Chem.* A compound formed by the union of an acid radical with a basic radical; an acid having the whole or part of its hydrogen replaced by a metal. (In wider theoretical use the term 'salt' includes acids as salts of hydrogen.)

The first marked step towards the modern conception of a chemical salt was Rouelle's definition (*a* 1770) of a neutral salt as a compound formed by the union of an acid with any substance serving as a base for it and giving to it a concrete or solid form. Various modifications of this or earlier views were put forward until the publication of Lavoisier's definition of a salt as the union of an acid with an oxide; this definition, however, was found to be inadequate when the composition of the halogen compounds, sulphides, etc. came to be accurately known. A further revolution in the theory of salts was made by Berzelius, who divided them into two classes; viz. Haloid salts, formed of an electropositive element and a halogen, and Amphid salts, resulting from the union of an acid and a base; the latter he subdivided into oxy-salts, sulpho-salts, selenio-salts, and telluri-salts. According to more recent conceptions (Arrhenius 1888) salts, including acids, are regarded as composed of positive ions or kations (hydrogen and metals) and negative ions or anions (halogens and acid radicals).

1790 Kerr tr. *Lavoisier's Elem. Chem.* 150–2 Acids may therefore be considered as true salifying principles... This view of the acids prevents me from considering them as salts. ..I shall not arrange the alkalies or earths in the class of salts, to which I allot only such as are composed of an oxygenated substance united to a base. 1807 T. †Salve, *v.*[2] *Obs.* [app. ad. L. *salvāre* to SAVE.

In the astronomical sense 1, the L. form was prob. adopted because the vernacular *save* did not sufficiently indicate the technical import of the word. In this use the word became virtually equivalent to 'solve', 'explain', and it seems probable that sense 2 (though in our quots. appearing earlier) arose as a generalized application of this notion. The remaining uses were no doubt suggested by mod. Latin phrases like *salvo jure*, *salvo honore*, etc.; see SALVO *sb.*[1]

1. *Astr.* To SAVE (*the appearances, the phenomena*), i. e. to frame a hypothesis which will account for all the observed facts of the apparent motions of the heavenly bodies. Hence *gen.*, to account for, explain by hypothesis. (Cf. SOLVE *v.*, used in the same phrases.)

1. *Theol.* The action of the Holy Spirit in sanctifying or making holy the believer, by the implanting within him of the Christian graces and the destruction of sinful affections. Also, the condition or process of being so sanctified.

By the majority of theologians sanctification is regarded as a gradual process, not (at least normally) completed in this life. The doctrine of *entire* or *perfect sanctification* (or of *Christian perfection*: see PERFECTION) is the view, held by some Protestants, that the condition of freedom from sin (though not from ignorance or infirmities) is attainable in the present life.

b. Extended to include the provision of rewards for obedience, along with punishments for disobedience, to a law (*remuneratory*, as distinguished from *vindicatory* or *punitive*, *sanction*).

1692 TYRRELL tr. *Cumberland's Law Nat.* iii. § 13. 126 The strictest Sanction which any Soveraign Power can give unto its Laws, is, when it..hath.. declared, That it will conferr a sufficient share of good Things, or Rewards, for so doing; and of Evils, or Punishments, upon any breach, or neglect of its Commands. 1727 J. App. H. 369 The sanction or close of the charter in these instruments is almost always the same, at least in substance—a sort of blessing promised to those who observe the grant, and of imprecation against those who break it.

3. *Ethics.* A consideration which operates to enforce obedience to any law or rule of conduct; a recognized motive for conformity to moral or religious law, operating either through the agent's desire for some resultant good or through his fear of some resultant evil.

As a technical term of Ethics, the word is favoured by the Utilitarians. For the classification of the different 'sanctions' see quots. 1780 and 1887. The sanction of law in the strict sense (see 2 above) is distinguished as 'legal' or 'political'. Bentham's 'moral sanction' corresponds to the 'social sanction' of other writers.

Law Nat* 72 The most powerfull and effectual Sanction in the World, *viz.* the Pleasures or Torments of Conscience. 1754 RICHARDSON *Grandison* VI. xix. 90 Religious zeal is a strengthener, a confirmer, of all the social sanctions. 1758 R. Legisl.* iii. § 2 There are four distinguishable sources from which pleasure and pain are in use to flow: considered separately, they may be termed the *physical*, the *political*, the *moral*, and the *religious*: and inasmuch as the pleasures and pains belonging to each of them are capable of giving a binding force to any law or rule of conduct, they may all of them be termed *sanctions*. 1794 PALEY *Evid.* II. ii. (1817) 55 To supply what was much more wanting than lessons of morality, stronger moral sanctions, and clearer assurances of a future judgement. 1817 JAS. MILL *Brit. India* II. v. ix. 709 The undivided reputation of good measures, the undivided ignominy of bad, redounded to the Court of Directors. The great sanction of public opinion therefore acted upon them with concentrated energy. 1861 MILL *Utilit.* iii. 39 With regard to any supposed moral standard—what is its sanction? what are the motives to obey it? 1874 SIDGWICK *Meth. Ethics* II. v. (1890) 164 These 'sanctions' we may classify as External and Internal. The former class will include both 'Legal Sanctions'.. and 'Social Sanctions'. 1887 FOWLER *Princ. Morals* II. iii. 144 Physical sanctions are the pleasures and pains which follow naturally on the observance or violation of physical laws, the sanctions employed by society are praise and blame, the moral sanctions..are..the approval and disapproval of conscience; lastly, the religious sanctions are either the fear of future punishment, and the hope of future reward, or, to the higher religious sense, simply the love of God, and the dread of displeasing Him. 1896 'M. FIELD' *Attila* IV. 102 For he rejects our sanctions, he is bound By nothing we are bound by.

4. Binding force given to an oath; something which makes an oath or engagement binding; †a solemn oath or engagement.

Inst.* ii. 87 Thus when a body of Brehon judgments was promulgated by an Irish chief to a tribal assembly it is probable that convenience was the object sought rather than a new sanction.

II. 5. A church or other sacred place in which, by the law of the mediæval church, a fugitive from justice, or a debtor, was entitled to immunity from arrest. Hence, in wider sense, applied to any place in which by law or established custom a similar immunity is secured to fugitives.
By English common law, a fugitive charged with any offence but sacrilege and treason might escape punishment by taking refuge in a sanctuary, and within forty days confessing his crime and taking an oath which subjected him to perpetual banishment. By the act 21 Jac. I. c. 28 § 7 (1625) the right of sanctuary in criminal cases was abolished. Certain places, chiefly actual or reputed precincts of former royal palaces, as Whitefriars, the Savoy, and the Mint, continued to be sanctuaries in civil cases until their privilege was abolished by the acts 8 & 9 Will. III. c. 27 § 15 (1696–7) and 9 Geo. I. c. 28 (1722). The abbey of Holyrood is still by law a sanctuary for debtors, but the abolition of imprisonment for debt has rendered the privilege useless.

‖ Saros (sē·rŏs). [Gr. *σάρος* or *σαρός* (Berossos), a. Assyro-Babylonian *šār(u.)*]

1. *Antiq.* The Babylonian name for the number 3600, and hence for a period of 3600 years.

The notion expressed in quot. 1662, that the saros consisted of 3000 *days*, is due to the desire to rationalize the incredible statements of Berossos with regard to the lengths of the reigns of the antediluvian kings of Babylon. Other expedients for the same purpose were adopted by early writers on chronology.

2. *Astr.* Adopted by modern astronomers as the name of the cycle of 18 years and 10⅓ days, in which solar and lunar eclipses repeat themselves.

This use is founded on the statement of Suidas (app. due to some mistake) that the length of the saros was 18½ years.
